

AGRICULTURAL NOTIFICATIONS DELEGATED TO THE NATIONAL PARK OFFICERS

App No.	Grid Ref.	Applicant, proposal, type, address	Decision	Date Issued	Decision Type
19/18142/AGR	N: 233769 E: 316423	<p>Mr Robert Davies <i>for</i> The works involve re-surfacing a 25 meter length of existing forestry track, the track is and will remain 4 meters wide. The surface is currently compacted clay and prone to waterlogging. Two twin wall unperforated drain pipes for surface water drainage of dimensions 300mm x 6m will be laid at low points on the track. A permeable geotextile membrane 25m by 4m will be laid on top of the pipes and the section of track to be re-surfaced. On this will be laid approximately 80 tones of compacted clean quarry stone of MOT Type I grade 40mm to dust to a depth of approximately 300mm . The stone will be freshly quarried local sandstone to match the local geology. The works will be carried out be certified contractors under Woodland Trust supervision in spring 2020.</p> <p>Why necessary for agriculture: Necessary for Forestry - The current forest road is a 4m wide compacted mud track. Wetter winters mean a 25m section has become impassable for tractors and 4x4 vehicles making extraction of timber harvested for onward sale very difficult. A short, 25m by 4m section requires improvement through the laying of clean compacted quarry stone to allow access for forestry works.</p> <p>Why designed for agriculture: Standard forest road construction design - 300mm of clean MOT Type I 40mm to dust quarry stone will be laid on a geotextile membrane with two 6m long re-enforced plastic pipe culverts installed to carry water under the track surface. The total area of the re-surfacing works will be 25m long by 4m wide. (Agricultural Notification) at Park Wood, Talgarth, Brecon Powys LD3 0DW</p>	Withdraw	20 December 2019	Delegated Decision
